

# Why were some loans really removed?

1. **Jobs retained** - the lender might cancel the application with unreasonable jobs retained amount
2. **Business type** - maybe the lender got more information about the business and found the business is not reliable and might not use the loan well
3. **Business age** - the government might prefer to put more funding to new and start-up businesses
4. **Undisbursed amount** - because lenders haven't fully disbursed the loan, so it's ok to cancel it
5. **Term** - the lender prefer to provide loans with shorter term
6. **Loan status** - most of the removed loans are on "Active Un-Disbursed", so the lender will not lose any when removing them from the application dataset
